Subject: Application for Design Engineer – Depollution Function

Dear Sir or Madam,

I am writing to express my interest in the position of Design Engineer – Depollution Function within your company. As a recent graduate in Mechanical Engineering with solid academic and project experience in design, modeling, and system reliability, I am eager to apply my skills to the development of innovative and efficient depollution solutions.

Throughout my studies and internships, I gained experience in CAD design, numerical simulation, and problem-solving in complex mechanical systems. I am particularly motivated to contribute to the optimization of engine emission systems, a field at the heart of today's automotive and environmental challenges.

I am convinced that my adaptability, technical background, and enthusiasm for innovation will allow me to integrate effectively into your engineering team and support the success of your projects.

I would be delighted to further discuss my motivation and qualifications in an interview.

Sincerely,

Hind ait mahmoud
